Dim-table

Product_id	Product_name	Category	Sub-category
123	Apple	fruit	fresh
124	Banana	fruit	Wild
125	Orange	fruit	Citricus

Fact-table

Order_id	Product_id	Store_id	Qty	Price
346	125	12	3	10

Sale_id,

Date_id,

Product_id,

Store_id,

Qty,

Revenue,

Dim_store

Store_id	Store_name
11	Soweto
12	Sanatbon
10	Braam

Primary SA_Citizens

ID_NO	Name(s)
9806025882973	Mujambete
9602578823	Thabiso
41078288	Zodwa

A primary key - is a column that uniquely identifies each row in a table

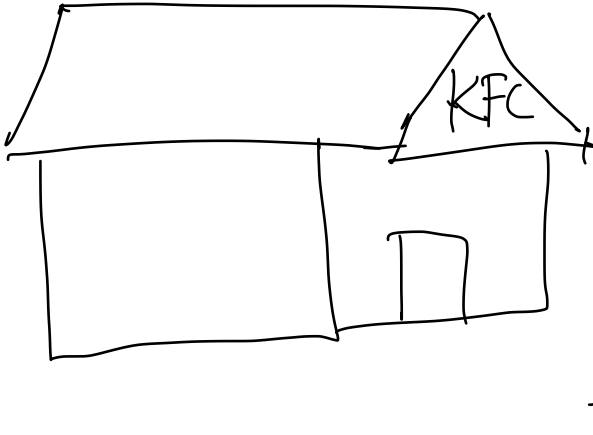

A Foreign key - is a column that links one table to another

Porsche_Sales

Order_id	Car_name	Model	Year	ID_No
111	Porsche	GT911	2012	9602578823
112	BMW	m4	2024	9602578823

foreign key

KFC

Str 2 pap - Order 232

Ice Cream - Order 124

Primary Key
Customer_table

Cust_ID	Name
111	Roghiwa
112	Jeff
113	Mark
114	Elon

Primary Key
Orders_table

OrderID	Cust_id	CustName
232	111	Roghiwa
124	111	Roghiwa
432	114	Elon
346	112	Jeff

foreign key

What is :

- ① Data Lake
- ② Data mart
- ③ foreign key
- ④ Primary
- ⑤ Database
- ⑥ Datawarehouse
- ⑦ Schema
- ⑧ AI — GenAI
- ⑨ Prompt Engineering
- ⑩ Snowflake
- ⑪ Databricks
- ⑫ Microsoft SQL server
- ⑬ Github, Git, GitLab
- ⑭ Version Control
- 1 Big Query
